Waterloo - Open to Relocate

SUMMARY

Software Engineering Technology graduate with experience across supply chain analytics, automation and full stack development. Currently support transportation analytics at Loblaw, automating recurring reporting and data workflows with Power BI, SQL, BigQuery, Python and Power Automate. Previous full stack experience with React, TypeScript, Node.js and MongoDB, with a focus on practical tools, process improvement and data quality.

SKILLS

- **Development:** React, TypeScript, JavaScript, Node.js, Python, SQL, MongoDB
- **Analytics & Reporting:** Excel Pivot Tables, Power BI, Power Query (M), BigQuery, pandas, KPI Reporting, Trend Analysis
- **Automation & APIs:** REST APIs, Power Automate, SharePoint Lists, Scheduled Jobs
- **Tools & Operations:** GCP, Azure, Git, Docker, Cetaris, Samsara, Transportation Operations, Data Quality

EXPERIENCE

Analyst, Transport Management, Loblaw Companies Limited, Cambridge, ON May 2026 - Present

- Automated KPI reporting into BigQuery and scheduled refreshes, eliminating **~30 minutes of manual work per business day (~130 hours annually)**.
- Automated Vehicle Activity Tracker refreshes in Power BI, removing **~10 minutes of manual work per business day (~43 hours annually)**.
- Built **Power Automate and SharePoint workflows**, including DCFC charger issue routing by location, avoiding an estimated **5-8 minutes of manual handling per submission**.
- **Improved reporting accuracy** by correcting missing SLC truck mileage and fixing operational metrics including vehicle assignment driver counts.
- **Built independent reefer runtime data collection** to overcome Lynx limitations and preserve historical data for maintenance and cost analysis.
- Helped unblock the **NSC CVOR Agent AI initiative** by driving platform access coordination for AI supported carrier safety document management.
- Built automation pipeline for response collection and sending automated emails from Vendors saving **25+ hours annually** on response collection on unstructured data from emails alone using Agent AI platform on GCP.

Full Stack Developer (Co-op), Virtual/Augmented Reality Lab (VARLab), Waterloo, ON Sep 2024 - Aug 2025

Asset Management Tool

- Built an internal asset management tool with React, TypeScript, Express and MongoDB used by **20+ Unity developers and faculty**.
- Gathered requirements from technical and non technical users and built a self service editor that reduced content updates **from days to real time**.
- Implemented Google OAuth 2.0 and JWT authentication and achieved **84% unit test coverage** using Vitest, Jest and React Testing Library.
- Added a local fallback to a shared Unity/Azure Cloud Save package so simulations could continue when Azure was unavailable.

EDUCATION

Conestoga College, Waterloo, ON Sep 2022 – Aug 2026
Software Engineering Technology (3 years + 1 year coop - Advanced Diploma)
GPA: 3.79

OTHER EXPERIENCE

Volunteer Developer, Civic Tech KW Feb 2025 – Jan 2026

- Helped build a Next.js volunteer directory and community website while coordinating development work through Jira and GitHub Projects.

Crew Member (Part-time), McDonald's, Kitchener, ON Oct 2022 – May 2026

- Served customers in a high volume environment, resolved issues quickly and communicated clearly under pressure.
